13th January Meeting - MacArthur Museum

Date

13 Jan 2020

Participants

- Amber Emeny
- Sarah Aldrich
- Rory Bell
- Fiona Garnes
- John Wright

Goals

- Gather information about the functionality of the application from the client.
- Gauge development scope.

Discussion topics

Item	Notes
User interface	- ease of use - one scope where all functions can be accessed
Time requirement of the client	- meetings once a week - decision to test
Ability to modify	- add categories - potentially subdividing categories
Connecting to other digital assets	- ehive - field for a URL (open in a new tab)
Flexibility in search criteria	- fine filters - drop down menu to avoid spelling errors - multiple filters applied at once
Fields	- categories - links - storage location (filing cabinet)
Authorization roles	- Admin, User and Guest - Admin can edit, delete, create categories, customization - User can upload, populate data, cannot delete - Guest is read only

Issues created in meeting

MERN-1 - Write User Stories
DONE

MERN-4 - Create Desktop Wireframes
DONE

MERN-5 - Edit a Data Flow Diagram
DONE

Decisions

Decide how the user authorization model will work.

Discern the cost of image hosting to the capacity that the client requires.

This a test.
